

MAZEN SAAD

Junior Data Engineer

Egypt, Alexandria | 01220734881 | saadmax020@gmail.com | LinkedIn: mazen---saad | GitHub: ETLsmith-sys

SUMMARY

Junior Data Engineer with 2+ years of backend software engineering experience. Skilled in building scalable ETL pipelines and Data Lakehouse architectures. Hands-on expertise in PySpark, Databricks, and SQL. Experienced in workflow automation and data transformation. Currently learning AWS for Data Engineering and seeking an entry-level opportunity.

SKILLS

- SQL (PostgreSQL)
 - Python (OOP)
 - Apache Spark (PySpark)
 - Databricks (Jobs & Pipelines)
 - ETL Pipelines (Extract, Transform, Load)
 - Data Warehousing
 - Git & GitHub
 - AWS (Currently Learning)
-

EXPERIENCE

Junior Data Engineer / Data Engineering Trainee

Nov 2025 – Feb 2026

Mentorship Program - Data With Baraa

Completed a full professional Data Engineering roadmap under mentorship.
Built scalable data pipelines and ETL workflows using Databricks, PySpark, Python, and SQL.
Developed automated workflows using Databricks Jobs & Pipelines.
Designed and implemented a complete Data Lakehouse architecture.
Applied data validation, transformation, and distributed data processing best practices.
Managed project code and version control using Git and GitHub
Hands-on training through a structured mentorship program with practical real-world projects

PROJECTS

Final Project – Data Lakehouse System

Jan 2026

- Designed and implemented a complete Data Lakehouse architecture using Databricks.
- Built ETL pipelines with PySpark, Python, and SQL.
- Automated workflows with Databricks Jobs & Pipelines.
- Full project code and documentation available on
 - GitHub Repo: <https://github.com/ETLsmith-sys/pyspark-dataLakeHouse-project>

EDUCATION

Bachelor's Degree in Management Information System (MIS) & Computer Science

Oct 2024 – Jun 2028

Kilometer 47, Beheira Governorate, Egypt

Expected Graduation: 2028
